

Gazelle Ultimate T10+ Speed Dual Battery Kit

Two batteries, two times the range! The Gazelle Ultimate T10+ Speed has been introduced onto the market with the commuter in mind. These fast bicycles are equipped with a high capacity PowerTube 500 battery that has been smartly integrated in the frame. For the convenience of the moderate to long-distance bike commuter, the high-step frame versions of this model can be equipped with an extra battery that clicks into place on a bracket. The Bosch PowerPack 500 frame-mounted battery connects directly with the Bosch system. In combination with the integrated PowerTube 500 battery, this bike has 1000 Wh at its disposal, allowing riders to cycle twice as far. As an added bonus, the charge status of both batteries is visible on the bike's display.

Dual Battery Kit-Eligible Ultimate T10+ Speed Bicycles

Bike	SKU	Size	Dual Battery Kit SKU
Ultimate T10+ HMB	G0706	H53	998812000
Ultimate T10+ HMB	G0707	H57	998812000

Important comments/FAQ

General

- The Ultimate Dual Battery Kit is not supplied with the above models; this needs to be ordered separately via the dealer portal
- Gazelle advises and facilitates the use of the Ultimate Dual Battery in combination with a 500Wh PowerPack frame battery.
- The Ultimate Dual Battery Kit **cannot** be mounted onto a mid-step frame.
- During charging both batteries are charged at nearly the same time. During cycling both batteries are used at the same time.

Ordering

- The Dual Battery Kit Ultimate can be ordered as a part under number: **998812000**, both via the dealer portal and by telephone via CSC.
- The Ultimate Dual Battery Kit is supplied without Battery. The associated battery is Bosch PowerPack Frame 500Wh. This needs to be ordered separately as a part from QBP. The QBP number is: EX1003

Mounting on the bicycle

- The Gazelle dealer should mount the Dual Battery kit on the bicycle and connect it to the motor system in order to prevent malfunctions on the motor system. What's more, the guarantee is only valid for the Bosch system if the mounting has been carried out by an authorized Gazelle dealer.
- Before mounting, carefully read the mounting instructions supplied with the Dual Battery kit.
- Once the Ultimate Dual Battery kit has been connected correctly, the Bosch system will recognise this automatically; the status of the second battery is then also visible on the display.
